BILL TO: Mr Morris
Sekenani Massai-Mara

Please find attached description of site feasibility study for the proposed site visit

STUDY DESCRIPTION	
1.	Assess Water Source: Determine the availability and characteristics of the water source
2.	Site Evaluation: Conduct a thorough site evaluation to identify the suitability of the location for hydraulic ram pump installation.
3.	Cost Analysis: Perform a comprehensive cost analysis that includes the initial investment for the hydraulic ram pump system, installation expenses, ongoing maintenance, and potential savings in terms of energy costs.
4.	Technical Considerations: Evaluate the technical requirements for the installation, including the size and capacity of the hydraulic ram pump, pipe diameter, and required equipment.
5.	Environmental Impact: Assess the environmental impact of installing a hydraulic ram pump, considering factors such as water source sustainability, ecological balance, and potential disruption to the natural habitat.

DESCRIPTION	QTY	UNIT PRICE	TOTAL
1. Transport facilitation Ksh. 30 x Distance to and from the site	Sekenani Mara-Ruiru	(260km x 2) x Ksh.30	15,600.00
2. Technical report	Lot. 1	3,000.00	3,000.00

TOTAL Ksh. 18,600.00

PAID Ksh. 0.00

Balance Due Ksh. 18,600.00
